OISE at Cambridge

Paving the way between education and business

Through higher education

Our tailored approach to English language coaching, allows our students to increase their overall level of English rapidly in a short space of time. Through dynamic group classes, focused 1:1 Tutorials and interactive workshops we prepare students for a wide range of international English language examinations (The Cambridge Suite, TOEIC, TOEFL, GMAT, Linguaskill and many more) as well as acquiring new business English skills. For example, our IELTS preparation classes (max. 8 students) and one-to-one Tutorial sessions with coaching provided by our experienced trainers, mean that the majority of our students increase their overall IELTS score by .5 per month!

With a focus on your future

Our language trainers come from various professional backgrounds, whose experience we use to deliver our intensive industry-focused language programmes. These specialist programmes are designed not only to look at the use of English in industry, but to improve the business skills, vital to success in their specific industry. During our industry-related Tutorial sessions, students look at key terminology and establish new ways of conducting themselves in an international business environment.

Specialists in English

including

Banking & Finance – Engineering – Iron & Steel – International Trade

Journalism – Law – Medicine – Oil & Gas

Pharmaceuticals – Renewable & Sustainable Energies - Telecommunications

By building confidence in your English ability

An on-going analysis of the student's specific needs within our fully immersive English language environment gives our students the resources and practice required to strengthen and activate their English language abilities.
